

Kodak Software Suite Locating/Changing Password Information for Client Control Panel

A. To locate the Client Control Panel password information:

- 1.) Using Windows Explorer or My Computer, search down to the Encad Software Suite folder: **C:\Program Files\ENCAD\Server Printer Control Center**.
- 2.) Once in the folder, double-click on the "create_admin.bat" file.
- 3.) A DOS window will open, displaying a temporary login ID with password. Record this information and log into the Client Control Panel using these credentials.
- 4.) After logging in, the operator may create a new login ID, or set a new password.

B. To change the Client Control Panel password information:

- 1.) Launch or ensure the 1200i (NJ1000i) Software Suite Server is running and is seeing the printer.
- 2) Launch the 1200i (NJ1000i) Client Control Panel (will take approximately 10 seconds to launch and be displayed); a user logon ID/password should be prompted. Do not enter any information at this time.
- 3.) Using Windows Explorer or My Computer, search down to the Encad Software Suite folder: **C:\Program Files\ENCAD\Server Printer Control Center**.
- 4.) Once in the folder, double-click on the "**create_admin.bat**" file. Record the User ID and password information currently displayed in the DOS window.
- 5.) Back in the 1200i Client Control window enter the recorded User ID/Password information. Logon should be successful at this point.
- 6.) With the 1200i Client Control software suite still running, select **Tools – Administration – Users**. Click on **NEW**. Change the User ID and password to new setting. Enter relevant information in all windows, be sure to Permissions to **Administrator**.
- 7.) The new User ID and password will work from this point on.
